

# **PUBLIC WORKSHOP**

## To Plan for Lancaster Township's Future

**Wednesday, May 22, 2019  
6pm-7:30pm**

**Community Center,  
113 Kings Alley**

The future is sure to bring new development and change to Lancaster Township. Change is managed through planning – planning for the best locations for development and for open space, for acceptable amounts and intensities of development, for improvements to roads and extensions of public utilities, etc.

Lancaster Township is now planning for the next 10 years. The Township intends to prepare a practical plan that will be shared with citizens late in 2019 before its formal review and adoption. Join us for this first public conversation about the next 10 years.

Township residents and business owners are invited to a workshop to help outline the priorities for managing future development.

Attend the workshop to discuss:

- What features and conditions should be protected or sustained?
- What features and conditions should be different by 2030?
- What are the opportunities to strengthen development policies and conditions?
- What issues in development should be addressed to result in better and more predictable outcomes?
